ILLIA MAKOVETSKYI

Fullstack Developer

+46 76 934 1139 | makiwebdeveloper@gmail.com | Stockholm, Sweden | Personal Website | GitHub | LinkedIn

SUMMARY

Fullstack Developer focused on turning ideas into working digital products. Experienced in building end-to-end applications, from user interfaces and backend systems to real-time functionality and interactive experiences. My work includes e-commerce platforms, AI-powered tools, and an interactive 3D project presented at DevSum in Stockholm. I approach development with a focus on both engineering and the end-user experience.

EXPERIENCE

Active Solution — Stockholm, Sweden

Fullstack Developer / LIA Intern — 01/2026 – 06/2026

- Co-developed Active DJ, an interactive 3D game showcased at DevSum 2026, working across frontend, backend, UI/UX, and deployment using React, React Three Fiber, and C#/.NET.
- Improved performance from approximately 30 to up to 100 FPS by replacing a physics library with custom interaction and collision logic.
- Built a game management panel and helped deliver an engaging booth experience that attracted repeat players.

NovaBit | Freelance Team — Kharkiv, Ukraine

Fullstack Developer — 03/2024 – 12/2025

- Developed fullstack automotive and e-commerce platforms with vehicle catalogs, admin panels, multilingual support, and dynamic SEO optimization.
- Rewrote a Python-based backend component in Go, significantly improving API response times and data processing performance.
- Built real-time multiplayer functionality using WebSockets for a Telegram Mini App, optimizing animations and mobile compatibility.

NIX Solutions — Kharkiv, Ukraine

Frontend Developer Intern — 01/2023 – 06/2023

- Developed responsive UI components, landing page sections, and animations using React, JavaScript, HTML, and CSS under mentorship, contributing to project milestones and improving user interface consistency.

SKILLS

Programming languages: HTML/CSS, TypeScript, JavaScript, SQL, Go (Golang), C#, .NET, Python, Solidity

Technologies: React, Next.js, Node.js, Express, NestJS, Vue, Redux, Zustand, TanStack Query, Tailwind CSS, React Three Fiber

Databases & Tools: PostgreSQL, MySQL, Prisma ORM, Supabase, Docker, Git, GitHub Actions, Vercel, Railway, Figma

Spoken Languages: English (Advanced), Swedish (Advanced), Ukrainian (Native), Russian (Fluent)

PROJECTS

Focal | AI-Powered Productivity Platform

Independently built an AI-powered productivity app with a custom agent orchestration loop and backend tools for intelligent task planning and project management. (*TypeScript · Next.js · Express.js · PostgreSQL · Prisma ORM · OpenRouter)*

VTIKHA

Independently developed a live e-commerce platform with product management, checkout, payments, inventory tracking, and an admin panel. (*TypeScript · Next.js · Express.js)*

MakMoney

Built a personal finance app with multi-account tracking and goal-based savings pools to manage reserved funds and everyday spending. *(TypeScript, Next.js, Supabase)*

Acars

Developed an automotive sales website for a Ukrainian company importing vehicles from US auctions, multilingual catalogs, price calculators, and an admin panel, including backend API optimization using Go. *(Next.js, TypeScript, MySQL, Python, Go, Zustand)*

ActiveDJ

Co-developed an interactive 3D game showcased at DevSum 2026, featuring DJ controller input, custom physics interactions, and optimized rendering performance. *(React, React Three Fiber, C#/.NET)*

Soundy

Independently built a fullstack music platform featuring track publishing, audio playback, playlists, albums, likes, and player controls. (Next.js, TypeScript, Zustand, PostgreSQL)

EDUCATION

Chas Academy — Higher Vocational Education (YH)

Fullstack JavaScript Development — Stockholm, Sweden • 09/2024 – 06/2026

HCTC NTU "KhPI" — Professional Junior Bachelor • Kharkiv, Ukraine

Software Development — 09/2020 – 05/2024
